Grade Level Standards and Components

The Grade Level Standards and Components represent the guaranteed and viable curriculum for all secondary students in Ankeny. Prioritized through a collaborative process, the Grade Level Standards and Components represent the most critical concepts and skills required to be successful learners in school and beyond high school.

The code in parenthesis represents the standards from the Iowa Career and Technical Education Standards - the original document used for the prioritization process. Any Grade Level Standard (Bold and Underlined) labeled as a “Focus” area will have evidence in Infinite Campus’ gradebook and student performance will be reported on a report card. Those Grade Level Standards are the most critical to student success and, as a result, have been designated as focus areas.

Those Grade Level Standards (Bold and underlined) labeled as “Foundational” or “Introductory” have been designated as agreed upon areas for instruction, but will not have performance reported in Infinite Campus or on a report card. The difference between the levels is the amount of direct instruction and/or experiences students have with the skill during that grade or course.

Any Components (not bold or underlined) under the Grade Level Standard labeled as “Focus” are the critical formative skills required to demonstrate the Grade Level Standard and evidence of learning will be recorded in Infinite Campus. The preponderance of evidence on each Grade Level Standard will determine the performance level on each Grade Level Standard.

The prioritization process allows teachers to target instruction on the skills required for that grade or course. This allows students to focus on only a few grade level standards and dive deeper into the learning. By having multiple and varied opportunities to demonstrate their learning, reporting on the performance of grade level standards is more accurate.
